

Sergio Rubinstein, DDS

ORTHO-PERIO-IMPLANT- RESTORATIVE SYMBIOSES: PLANNING AND TREATING THE ADVERSE CASE

SEPTEMBER 22, 2021

Dr. Sergio Rubinstein received his dental degree in 1980 from the Universidad Tecnologica de Mexico. From 1980-82 completed his Prosthodontic specialty-training program in Periodontal-Prosthesis at the University of Illinois at Chicago where he was an Assistant Professor until 1992. Is in private practice since 1986 and presently as a founder and practicing dentist at Dental Reconstruction Center. Member of numerous associations has lectured to major Associations such the American Association of Oral and Maxillofacial Surgeons, American Prosthodontic Society, Academy of Prosthodontics, American Academy of Periodontology, Academy of Osseointegration, American Academy of Esthetic Dentistry, Southwest Dental Conference, American Academy of Cosmetic Dentistry, Chicago Dental Society, New York Dental Meeting, American Dental Association Annual Meeting and currently lectures nationally and internationally. Lecturer at DentalXP, an internet lecture site. Given hands-on courses in Adhesive Dentistry and Implant Prosthodontics. Has published several articles in Adhesive Dentistry and Implant-Prosthodontics. Author of two chapters for books in Implant Prosthodontics and the Art of Treatment Planning. Inventor of a custom abutment to prosthetically correct misaligned implants.

COURSE DESCRIPTION:

Simple and complex cases must be properly diagnosed followed by a detailed treatment plan and meticulous executions. To achieve the desired goals, everybody must be on the same page. This lecture will focus on cases that have encountered poor treatment planning and execution, their respective treatment with a discorded team and the attempt to minimize compromised results.

Objectives:

Upon completion of this presentation participants should be able to understand:

- Consequences of improper diagnosis and treatment planning.**
- Complications when treatment planning and execution do not coincide.**
- Complications when patient dictates treatment.**
- Complications when the treating team has different goals.**
- Understanding how often objectives should be re-evaluated.**
